

satellit_ Hi
JT4sugar Hi
satellit_ what did you want to discuss re DVD?
JT4sugar The set up and the files included in DVD
satellit_ Ok
JT4sugar Do you happen to have Skype?
satellit_ no I don't
JT4sugar Ok
JT4sugar Just thought adding voice into this may make it flow a little smoother
satellit_ <http://people.sugarlabs.org/Tgillard/SugarCreationKit09-Contents.txt> I assume this is what we need to reference
JT4sugar I am going to email you a PDF with views of files on DVD from each folder-One minute
satellit_ * I have requested "Feature" status in soas lists and pbrobinson has responded favorably
satellit_ ok
satellit_ Did you find the contents too technical?
satellit_ got the pdf
JT4sugar To some degree. I am not a linux person or much of a command line person
satellit_ liveusb-creator is best one (I did a remix where it is on the CD.iso of Mirabelle
satellit_ It then is a graphical install in native fl3 of CD
satellit_ <http://people.sugarlabs.org/Tgillard/Mirabelle-Remix-pl--LiveCD.iso>
JT4sugar I think USB creator needs to be on Creation Kit for sure and would like to make part of update to Computers and Writing Group
satellit_ * should ease installs for non command line use (but requires starting in terminal - not sugarixed yet
satellit_ s/sugarized
JT4sugar My biggest goal of this is to allow the less technical become technically efficient. A PDF with some command line basics-Explanation
page to read first
satellit_ Easy to add it. You can do the build yourself with instructions on DVD How to make your own custom iso file.pdf
satellit_ It is in floss manuals on DVD I think The Terminal.pdf
satellit_ Maybe the layout of the DVD needs to be looked at ;)
JT4sugar For individuals like yourself, Mel, Sdz and most others that work in the community now that's a relative breeze for us non-tech it qu
satellit_ I know...any suggestions or additions are VERY welcome
JT4sugar Having to bounce to many locations for information quickly causes overload you make a few mistakes get errors and then just quit
satellit_ I wish I could make a remix where the liveusb-creator just started on boot....
sdziallas JT4sugar: hi!
satellit_ Maybe a DVD where the iso is included on it
JT4sugar So If we look at PDF I sent lets walk through and clear out Double Files and organize for ease of use
satellit_ OK go....:)
JT4sugar Hi SDZ- I will send you PDF now
sdziallas JT4sugar: while it's certainly not entirely applicable for Sugar, I've just found a visualization of Fedora's feature process.
sdziallas JT4sugar: http://fedoraproject.org/wiki/File:Features_Policy_feature-process-flow2.png
sdziallas hi satellit !
satellit_ * I have a folder with original files which is live duplicate of pdf here...
satellit_ hi sdziallas
sdziallas JT4sugar: (thanks!). now we certainly won't take the whole feature process over - it's way too complex for our purposes - but I thoug
JT4sugar sdziallas, Thanks I just think a visual that ties SoaS to Sugar and Fedora and others lets people quickly understand Big Picture and
sdziallas JT4sugar: agreed!
JT4sugar sdziallas, Another one that does this for Sugar as a whole would be as helpful
sdziallas JT4sugar: did I show you this already? <http://people.sugarlabs.org/sdz/soas-model.svg> (it's outdated and not really anywhere near fin
satellit_ sdziallas pbrobinson got back to me and will help on process next week (onsoas list)
sdziallas satellit_: cool, I'm glad to hear that :)
* sdziallas will be writing more about the feature process (and I think we'll raise it at the next meeting. too).

JT4sugar sdziallas, Not yet. Part of it is many of these things are on wiki its just for someone new you would only bump into by chance in most cases

satellit_*monday?

sdziallas JT4sugar: (got the email, thanks)

JT4sugar Sdz Thought we would go through and clean up

sdziallas JT4sugar: yeah, right. I do agree, but I also feel that the overhaul to the SoaS wiki page was a major improvement.

sdziallas (which is by no means a statement to stand still :)

* sdziallas nods.

JT4sugar sdziallas, A huge step forward!! For the elementary teacher and students bringing this to a clearer level with Visuals/PDF's for the non-connected is a Big Deal!

sdziallas JT4sugar: yup, makes sense! :)

satellit_* I wish for an installer DVD remix which boots to liveusb-creator (and has mirabelle on it ready to go)

JT4sugar satellit_, Yes but I don't mind having people Learn how to do all this, it's just the way we package How to do's need to be more concise and not always centered around the Wiki-Many use in non-well connected environments. Plus may have only one computer-trying to work on computer while following directions in Wiki very tough

JT4sugar Can we start with the first page of PDF

satellit_ OK. How would you change the DVD

JT4sugar 1. All text Files would become PDFs

JT4sugar 2. There are some doubles of files that should be paired down-

JT4sugar 3. With ASLO Folder a PDF explaining what user should do to use. May be in there didn't see it

satellit_ does using directories for subcatagories work?

satellit_ there should be a line about drag-drop installs....

satellit_ These can be copied to a 1-2Gb USB and drag-dropped into the sugar Journal to install them. in contents of this DVD

JT4sugar Maybe a PDF of How to Drag and Drop but additional Info on testing and Bug Reporting, trying to engage and bring into the community

satellit_ ok

JT4sugar satellit_, I guess the best way to think about this, Imagine you were making this DVD for a 3rd or 4th grade Teacher/Student the instructions if put to this level would be a Huge Step in recruitment/use

satellit_ Can we have DVD autoboot on a video? would that help)takes a lot of space)

JT4sugar satellit_, The Files that require a lot of knowledge maybe should be put in a experienced user folder

satellit_ ok

JT4sugar Image writer-Image writer-Explanation what for-Its own folder?

satellit_ I think haveing v2 and v1 blueberry and strawberry is important though

satellit_ can make folders for install methods,,

JT4sugar satellit_, Don't think you should take anything out. Just trying to organize in a way that doesnt confuse newcomer

satellit_* I included script and imagewriter on main page and in older versions just os they would be obvious.....(had extra room) thus duplicates

satellit_ s/so

sdziallas I wonder whether these versions should be promoted, though, but that's a convo for later.

satellit_ ok

satellit_ I was thinking for compatability with XO-1 0.86-0.84 versions

satellit_ " sneakernet" for deployments

JT4sugar satellit_, I think main page should be Glossary PDF and other PDFS having people read up before proceeding. PDF's should then point to folders for images and files

satellit_ ok can do

JT4sugar satellit_, Yes those tools should be there just make a special folder for them

satellit_ not sure if I know how to put links in PDF to go to them....would be nice to make hyperlinking work on DVD

JT4sugar satellit_, live-iso-to-disk and live-iso-to-disk.sh in main page and Older version folder

satellit_ k

JT4sugar satellit_, Don't nescessarily have to link although would be nice, I meant just say...Pleae go to folder....and choose file/image...

JT4sugar Please

satellit_ sdziallas: can we make a stripped down fl3 with auto start to liveusb-creator and mirabelle .iso preselected?

satellit_*all on one CD?

JT4sugar satellit_, soas-1 boot and soas-2 boot on main page and in Older versions folder

satellit_ ok

sdziallas satellit_: I dunno, probably.

satellit_ it would be a much simpler installer

JT4sugar satellit_, Working with Live USB's has two text files main page and PDF file in Older versions-all look pretty much same-pair down to one?

satellit_ will do....

*weed out duplicates
JT4sugar satellit_, Contents of DVD text file on main page dated 3/27 and 4/21 version 7 and original? Do we need?
satellit_ only latest This was my idea of an intro file (hence links and explanation lines....Should it be expanded into a PDF?
satellit_ * Maybe only thing available -rest in subdirectories
JT4sugar Yes and I think this becomes Glossary as well to explain terms, files(what they are and for), Images other important info-
satellit_ ok also credits for sources
JT4sugar Would like to see Collaboration page from Floss Manuals be added to that collection
satellit_ Will work on a mock up and forward it to lists
satellit_ ok add Collaboration
JT4sugar satellit_, Your doing fantastic work!! Thanks so much. To have people at University Level School of Education come on board. This bring down Technical level approach helps me alot!
satellit_ yw...I did this as an idea to help Caryl Bigenho
satellit_ then realized ASLO .xo files could be on stick
JT4sugar satellit_, When you're mock up ready can you send PDF of images of DVD/Folder contents like I sent you? Easier then long download. Allows me to see what are future Sugar Contributors will encounter when receive DVD
satellit_ I will try to make changes and send to you as PDF :)
JT4sugar Cant spell today-your
JT4sugar Ok That would be Great! Then we can pick up at Monday SoaS V4 meeting
satellit_ * It will take a while but will mock it up
satellit_ *lots to do.....
JT4sugar satellit_, Understand with all you've been doing
satellit_ The idea of DVD as Feature still goes forward no matter what....
JT4sugar satellit_, Yes thinks that's important
satellit_ need acceptance by 07/27/2010 soas and fedora?
satellit_ anything else?
JT4sugar Just want to say sorry for throwing your hat in ring for release manager it was just a thought
JT4sugar satellit_, Look forward to the continued collaboration on this-Much Appreciation!
satellit_ Thanks I appreciated the thought. but there have to be more qualified people. (I do not program)
satellit_ yes thanks for your contributions....remember anyone can make a DVD version...:)
JT4sugar I think it's more of a faciliation leadership to goal/objective position
satellit_ How to make your own custom iso file.pdf :)
satellit_ ok
satellit_ thanks I guess I will close this discussionIf no one else has input.
JT4sugar Sounds good. Have a Great Day!
satellit_ bye all...
satellit_ * off to work
